Partners

We work with major vendors to provide the most technically performant and commercially advantageous solutions for our customers, across the complete technology stack.

We engage in a unique vendor supply chain to deliver value, quality and commitment to our customers.

We have carefully selected every supplier to ensure compliance, reliability and availability of products and services, which in-turn enables our customers to achieve greater ROI from their IT estate and investment.

As a Microsoft Silver Certified Partner, we have demonstrated the knowledge, skills and service level to help our customers design, supply and implement a range of Microsoft technologies such as cloud (Azure and 365), Windows and server solutions.

Our staff are MCP (Microsoft Certified Professional) accredited.

HP provide a range of hardware solutions for businesses. As HP partners, we are able to advise on and implement HP hardware solutions for our customer base, with direct access to new products, technical information and customer management teams.

We deliver enterprise solutions to meet customers' data centre and networking requirements through our HPE business partnership, with access to their range of server, storage and networking elements.

Cisco is a leading manufacturer and supplier of networking equipment and network management hardware. Stephens IT is a Cisco Premier Partner and has been Cisco accredited since 2012.

Meraki

As a certified Meraki partner, we are able to design, procure, implement and support Cisco Meraki's full suite of cloud products. Meraki is our preferred networking technology product for SMEs - we use the cloud-based management features of the products to remotely support and maintain customer networks.

We hold the Citrix Silver solution partner accreditation, allowing us to provide sales expertise, technical delivery and customer education on Citrix's suite of products.

As organisations look to adopt a more digital environment, Citrix provides a range of workplace-based solutions including virtualisation of applications and desktop environments.

Stephens IT is one of the selected Dell Premier Partners, enabling us to offer a range of technologies to our customers at the best prices available in the UK.

From desktop to data centre, we continue to design and build solutions based on Dell infrastructure.

We partner with Exclaimer to provide our e-mail signature solution, which can be integrated with Microsoft 365, Exchange Server and G Suite to create consistent signatures for brand awareness and professionalism.

Offering autonomous endpoint protection through a combination of EPP and EDR, we partner with Sentinel One to deliver best-in-class security for our customers' endpoints.

We use Barracuda to deploy security and data protection and retention solutions to our customer environments utilising a number of products, such as e-mail security, network security and data backup.

With over a billion Apple products actively in use worldwide, Apple is the world's largest information technology company, designing and developing consumer electronics, software and online services.

We can advise on your Apple procurement, as well as offer added value services such as:

- + DEP enrolment
- + Pre-configuration and deployment with our lifecycle offering
- + Repair and maintenance via Apple Authorised Repair

We also support Apple environments as part of our Managed IT offering.

Lenovo

With the ability to directly purchase from and engage with Lenovo's internal teams, we can offer technical expertise and commercial value for our customers.
